Computer Network Operations

Associate of Applied Science Degree
Career Pathway Certificate, Computer Network Monitoring and Management
Career Pathway Certificate, Computer Network Security

Program Coordinator Joseph Colton, Bldg. 19, Room 144, 541.463.5249, coltonj@lanecc.edu

Purpose To train entry-level network support technicians and more advanced network administrators in specific computer networking skills and general troubleshooting of hardware and software related problems.

Learning Outcomes The student who successfully completes all Computer Network Operations requirements will:
- install and configure workstations and servers.
- install and configure internetworking devices such as switches and routers.
- administer an organization’s computer network infrastructure.
- demonstrate an understanding of network security issues and tools.
- demonstrate an understanding of the basic features of wireless networking.
- develop skills for doing network performance monitoring.
- interpret the concepts of a computer network related problem-solving task.
- use appropriate library and information resources to research network management issues and tools and support lifelong technical learning.

Cooperative Education (Co-op) Co-op is a required and important part of the Computer Network Operations program. It provides relevant field experience that integrates theory and practice while providing opportunities to develop skills, explore career options, and network with professionals and employers in the computer network field. Contact Gerry Meenaghan, Cooperative Education Coordinator, Bldg. 19, Rm. 154, 541.463.5883.

Job Openings Projected through 2020
Lane County openings - 18 annually
Statewide openings - 256 annually

Wages
Lane County average hourly - $21.52; average annual - $44,745
Oregon average hourly - $24.83; average annual - $51,660

Costs (Estimate based on 2016-17 tuition and fees. Consult Lane’s website for updated tuition.)
Books .......................................................... $1,540
Program Specific Fees .................................. $208
Resident Tuition and General Student Fees ......... $10,099

Total Estimated Cost $11,847

*Course fees may change during the year. See the online credit class schedule for fees assigned to courses.

Course Requirements
- Prerequisites are required for some courses. See course descriptions.
- All courses must be completed for a letter grade of C-, except for the Communications, Writing, Math, PE/Health, and Human Relations requirements and CS 206 which may be completed with a “Pass” grade.

First Year
Fall
CIS 100 Computing Careers Exploration ......................... 1
CS 179 Introduction to Computer Networks ....................... 4
CIS 140W Introduction to Operating Systems: Windows Clients ................................................... 4
Choice of:
MTH 082 Math for Network Operations
MTH 111 College Algebra or higher .......................... 4-5

Winter
CS 206 Co-op Ed: Computer Information Technology Seminar ....................................................... 2
PE/Health Requirement ........................................... 3
CIS 125D Software Tools 1: Databases ....................... 4
CS 279 Essentials of Network Administration ............... 4
CIS 287 Microcomputer Hardware .......................... 4

Spring
Human Relations Requirement
CG 203 Human Relations at Work recommended ....... 3-4
CS 133P Beginning Programming: Python ................. 4
CS 240W Advanced Windows: Server Management .... 4
Choice of:
WR 121 Academic Composition
WR 121_H Academic Composition - Honors ............ 4
Computer Network Operations

Second Year

Computer Network Monitoring and Management

Offered by the Computer Information Technology Department, 541.463.5221

Career Pathway Certificate

Program Coordinator Joseph Colton, Bldg. 19, Room 144, 541.463.5249, coltonj@lanecc.edu

Purpose
Prepare graduates to manage and monitor modern network operating systems and the services provided by current, industry-standard platforms, including troubleshooting and proactive management for growth.

Learning Outcomes
The student who successfully completes all Computer Network Monitoring and Management requirements will:

• understand the performance fundamentals required to keep computer networks efficient.
• install and configure Windows and Linux servers and Cisco routers and switches.
• identify sources of network performance problems and resolve them.
• implement the SNMP protocol on various networked devices.
• understand the importance of proactive management and planning for growth.
• install and configure an enterprise network monitoring package to track performance and availability of services.
• learn how to implement event handlers and notification/alert systems.
• learn to use protocol analysis software to monitor traffic and solve network problems.

Course Requirements
• All courses must be completed with a letter grade of “C-“ or better.

Computer Network Security

Offered by the Computer Information Technology Department, 541.463.5221

Career Pathway Certificate

Program Coordinator Don Easton, Bldg. 19 Rm. 148

Purpose
To train those who already have networking skills to secure workstations, servers, and other networking devices.

Learning Outcomes
The student who successfully completes all Computer Network Security requirements will:

• understand the security fundamentals required to help safeguard computer networks.
• implement wireless network security protections.
• identify and counteract attacks on workstations, servers, and other networking devices.
• identify vulnerabilities, discuss their resolutions, and generate vulnerability reports.
• install and utilize various security industry accepted tools.
• install and configure firewalls and VPNs.
• troubleshoot security issues and implement and test resolutions.

Course Requirements
• All courses must be completed with a letter grade of “C-“ or better.
