# Titan Store Fiscal Sustainability Efforts and Administration Recommendation April 11, 2019 

Bookstore management and staff, with support from college administration, have worked over the past five years to create a sustainable operating model for the store. Despite progress toward strategic goals, the store continues to experience operating losses due to student enrollment, promotion and support of open educational resources, and declining sales in non-text merchandise. As shared with the Board of Education in the March 14, 2019 Budget Update, Lane's bookstore has lost $\$ 1.47$ million in operations over the past five years. These losses are not from a lack of strategy or effort but rather due to a fundamentally unviable operating model.

## Background

After realizing a nearly $\$ 1$ million swing in operating income from 2014 to 2015, bookstore management began significantly reducing personnel costs through reduction in part-time scheduling, reassignment of contracted staff to other departments, holding vacant positions open, and reallocating costs between the bookstore and printing \& graphics. Staff FTE has been reduced by $60 \%$ since the enrollment surge peak in 2013, and is 7 FTE lower than pre-surge levels in 2007.

In 2017, the bookstore went through a comprehensive program review, with support from college administration. One of the primary fiscal strategies outlined in the program review plan was to limit personnel costs to $29 \%$ of sales. This year, with support from college administration, personnel costs are estimated to be $30 \%$ of sales, within $1 \%$ of the established goal. Even with these dramatic reductions in personnel, the store is projected to lose $\mathbf{\$ 2 5 0 , 0 0 0}$ before administrative recovery to the general fund, as shown in the financial report presented to the Board of Education.

The proposal presented to the board for maintaining the internal bookstore was not vetted by the administration or budget office. For example, the proposal estimates contracted positions at $\$ 160,813$ plus OPE while the actual cost is $\$ 210,920$ plus OPE, and the proposal's five year pro forma does not provide for any inflationary increases in personnel or materials and services.

Additionally, the proposal to retain the bookstore makes several assertions about fiscal impact, services, open educational resources, academic freedom, student workers, and customer service that have been addressed and rebutted by Barnes and Noble staff and information presented by the administration.

As the college continues to work to increase OER, including permanent funding of an OER librarian and more than $\$ 50,000$ annually to support OER development, the store will continue to lose revenue, narrowing the window for procuring viable partnership/outsourcing agreements.

After several years of unsuccessful strategic turnaround efforts, the bookstore has depleted its reserves and will require significant general fund support to continue operations. A contractual arrangement with Barnes and Noble will provide greater service and options for students, including expanded OER, and will contribute revenue back to the general fund that can be used to support core academic and student service functions.

## Administration Recommendation

After extensive analysis and consideration, the administration recommends using Barnes and Noble to provide this service to the campus community effective July 1, 2019. This recommendation is in alignment with the college's budget development principles and criteria; maintains academic freedom; provides access, service and affordability for students; and avoids involuntary reduction of contracted classified positions.

Report from March 14, 2019 Board of Education Budget Update

Bookstore Operating Income (Loss) and Staff FTE
FY2007 through FY2019

The bookstore has reduced contracted staff from 12 staff FTE plus 1 manager FTE in FY2015 to 3.15 contracted staff FTE plus . 6 manager FTE in FY2020. Part-time staffing to support rush and peak periods has been reduced commensurately. Despite these dramatic reductions, which limit the store's ability to provide service to students, the store continues to realize significant operating losses.

## Credit Student Headcount and Bookstore Staff FTE

 FY2007 through FY2019

In pre-enrollment surge FY2007, the credit student headcount to bookstore staff FTE ratio was 883 and the store's operating income was $\$ 610,526$.
In FY2019, the student to staff ratio has increased to 1,216 and the store has a projected operating loss of \$258,000.
